# Get Your Business Protected Fast
Cloud-based Disaster Recovery

As businesses continue to transform and become more digital, they also increase their dependency on technology—putting them at risk. You've invested in VMware to power your company, but you also need the security and flexibility of an off-premises, cloud-based disaster recovery solution that's designed specifically for your VMware environment.
Ransomware causes an average of
23 days of downtime
- Coveware

If you have a disaster recovery solution in place, there is a good chance there are challenges with it, including:

Operational time to manage and monitor	Costly capital investment in infrastructure	Business interruption for testing and validation	Can include gaps creating risk

Disaster Recovery as a Service (DRaaS) is a great option to cost-effectively improve IT resilience and streamline DR operations. While there are many piecemeal options for protection against disaster, **Atomic Data DRaaS offers a complete approach**.

Atomic Data DRaaS is a cloud-based disaster recovery solution that's designed specifically for your VMware environment. It provides fast, efficient and secure disaster recovery from on-premises to cloud, as well as cloud-to-cloud. Combined with our expert professional, managed and support services, our DRaaS is:

Provides Recovery Point Objective (RPO) of
5 minutes to 24 hours

Effective
- Business critical RPOs
- Covers hybrid scenarios
- Seamless scalability

Simple
- Easy to get started
- Self-service offering
- No infrastructure overhead

Lower TCO
- Zero capital investment
- Leverage VMware investments
- No new skills required

Secure
- Encrypted data in transit
- Built-in platform security
- Isolated workloads on cloud

Getting Started

It's easy to get started with DRaaS. Please visit atomicdata.com/DRaaS for more information or contact us at info@atomicdata.com or call 612-466-2000 to start the conversation.
