SECURE & PRODUCTIVE SOLUTIONS FOR LEGAL PROFESSIONALS

LOCKRIDGE GRINDAL NAUEN
P.L.L.P
Attorneys at Law

"I take security for granted when I work with Atomic Data. It's not something I feel like I have to second guess."

CHALLENGES

With a very small internal IT team, Lockridge Grindal Nauen needed subject matter expertise. Large data stores with advanced technology needs made managing their IT solutions difficult, and given the nature of their firm's data, they needed a trusted advisor who could provide engineering excellence.

SOLUTIONS

Using its deep bench of subject matter expertise, Atomic Data implemented advanced NetApp storage and enterprise-grade connectivity. Atomic Data also provided data center services, 24x7 network support and monitoring, and infrastructure lifecycle management.

bwf℠

"The relationship and the trust is there with Atomic Data. Our teams now communicate with Atomic Data about everything."

CHALLENGES

With BWF's prior vendor, the unthinkable happened — an encryption project failure that resulted in disastrous data loss. Support calls went unanswered and staff stopped asking for tech support. To add to the headaches, staff turnover with BWF's prior vendor skyrocketed.

SOLUTIONS

Atomic Data executed a complete network overhaul for BWF, resulting in a trusted IT partnership for staff and clientele. Atomic Cloud® private hosting would prevent future data loss and 24x7 IT Security as a Service would give BWF management peace of mind.

ATTICUS
SMART | ACCOUNTABLE | BETTER
CLASS ACTION ADMINISTRATION

"In the era of work from home, Atomic Data enabled greater performance for our business-critical terminal servers and in turn a more efficient workforce."

CHALLENGES

Atticus Admin's remote access servers had not been provisioned properly, resulting in both performance problems and an inability to scale. And with more people working from home due to the COVID-19 pandemic, performance issues accelerated.

SOLUTIONS

Atomic Cloud® private hosting brought Atticus Admin's server performance to the next level. With a virtual server migration, dedicated environment build, virtual firewall and remote access VPN implementation, Atomic Data significantly improved their operations.
